ROCKNOLL NURSERY, MORROW, OHIO

HARDY PERENNIAL FLOWERS

WEATHER PROOF PERENNIALS—Rocknoll is located 22 miles north of the Ohio River in Southwestern Ohio. We have severe cold winters often without a protecting snow blanket and hot dry summers. Temperatures range from 20 degrees below zero F. in winter to 100 degrees in the shade in summer. We have periods of heavy rainfall and periods of drought just the same as you do.

Our soil while very fertile and productive is only good farm land used for growing corn before we took it over. We do not have deep black celery soil or sandy old lake bottoms to force fast growth on plants that often fail to hold up when moved to your garden soils.

ROCKNOLL'S PLANTS WILL GROW FOR YOU

ROCKNOLL GIANT LONG SPURRED COLUMBINE

Superb strain of giant flowered varieties in every shade and color blend to be found in columbine. Stems are all long and graceful; flowers abundant on stems. The best columbine to transplant are one year old field grown plants, as these still have the vigor of their first full flowering period just ahead of them.

HUMIDIFIED PACKED ROSES

To assure a minimum of water loss, the roots of Rocknoll's roses are covered with a damp packing material and tightly rolled in moisture proof paper. The tops and the neck of the root covering package are then sealed by dipping in a special non-burning wax. This process assures the plants being viable and sure to grow.

NEW DISEASE-RESISTANT HYBRIDS

This is the elm that was developed in Holland a number of years ago by Dr. Christine Buisman. Repeated tests over many years by the United States Department of Agriculture show that it is highly resistant to both phloem necrosis and Dutch elm disease.

Buisman Elm is a selection of the European Smoothleaf Elm. It has a straight trunk with slender, but strong ascending branches that form a pyramidal head, or sometimes spreading and forming a round-topped head. The handsome foliage is dense and dark green. Buisman elm is highly satisfactory both for lawn and street planting.
